

The Ronnie Gardiner Method Introductory Courses

Introductory courses in the Ronnie Gardiner Method are offered in Dunedin 24th-25th June 2019; Christchurch 4th- 5th July 2019; Auckland 10th-11th July; and Auckland 13th-14th July 2019

Numbers are limited to 20 registrants at each venue.

Developed by jazz musician Ronnie Gardiner, the Ronnie Gardiner Method is a cheerful, structured, multi-sensory exercise method for the brain, in which rhythm and music are used to stimulate memory, balance and motor skills. Originally intended to help children with musical and motor development, the method has been used successfully in groups with stroke, Parkinson's disease, depression, multiple sclerosis, as well as healthy aging.

Taught by RGM practitioners Ronnie Gardiner (Sweden) and Mariken Jaspers (Netherlands), the course is suitable for practitioners who work with individuals or groups, in neurological rehabilitation or with older adults, who want to supplement their work with this innovative technique.

A follow up course for full recognition as an RGM practitioner will be held in November/December (dates to be confirmed). To participate in the follow-up course, attendance at this introductory course is mandatory.
